ATTENTION

The iOS software are under development. we will let you know once it available at App Store.

Please run the MagicTable shortcut on the PC desktop (usually it can be found from *C:\Program Files\PQLabs\MagicTable* by default).

Select application

Screen rotation (180 degrees)

Home Menu

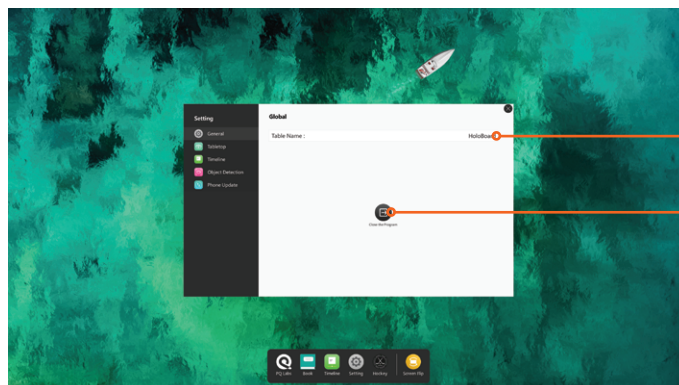

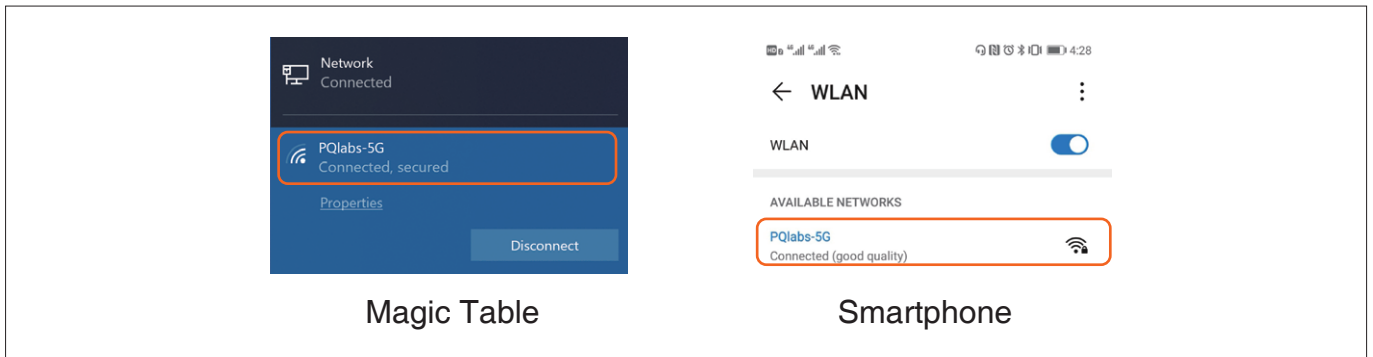

Table Name

Exit application

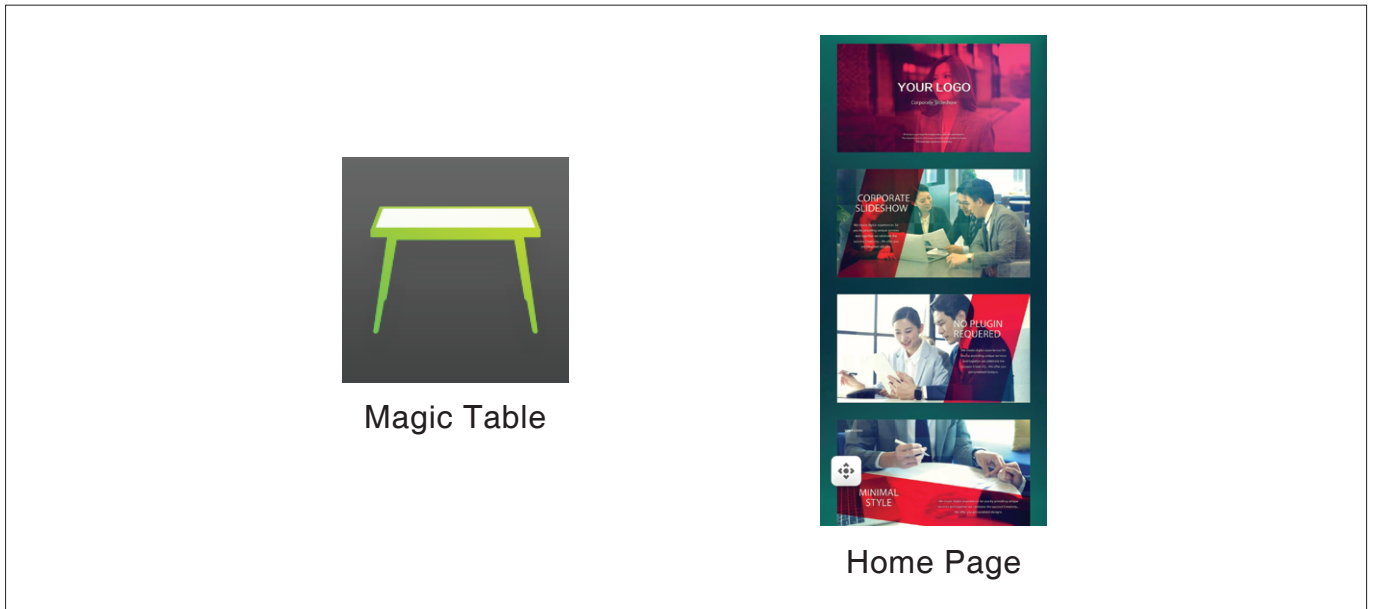

Setting

Smartphone Content sharing

- 1 Please make sure the PC and smartphone join to the same LAN network.

- 2 Run the Android app MagicTable on the smartphone.

- 3 Place the smartphone on the tabletop. The table will detect and connect with the smartphone.

ATTENTION

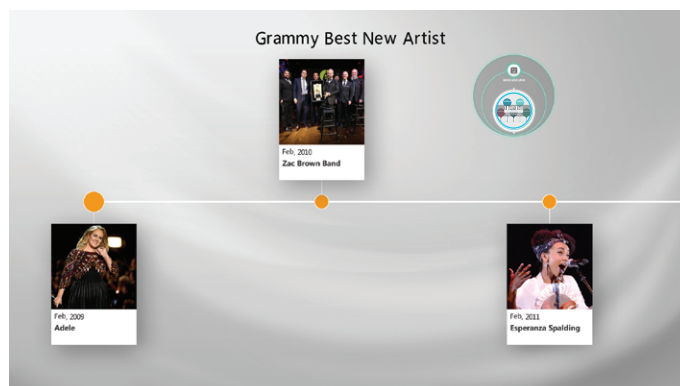

The smartphone has to be placed vertically to the user.

- 4 Then the user can drag the contents across the smartphone's border to the tabletop freely.

Tag control

The MagicTable support 3 different tags to trigger different applications. (Book, Timeline, Tabletop)

Digital Magazine

You can start the digital magazine by:

- Place the "BOOKS" tag on the tabletop.
- Or start the application by click the icon on the home screen.

Open another pdf/ppt
file

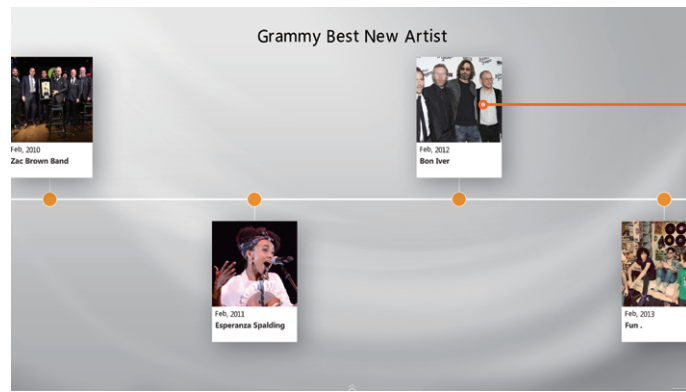

Finger swipe to page
up/down

Timeline

You can start the timeline application by:

- Place the "TIMELINE" tag on the tabletop.
- Or start the application by click the icon on the home screen.

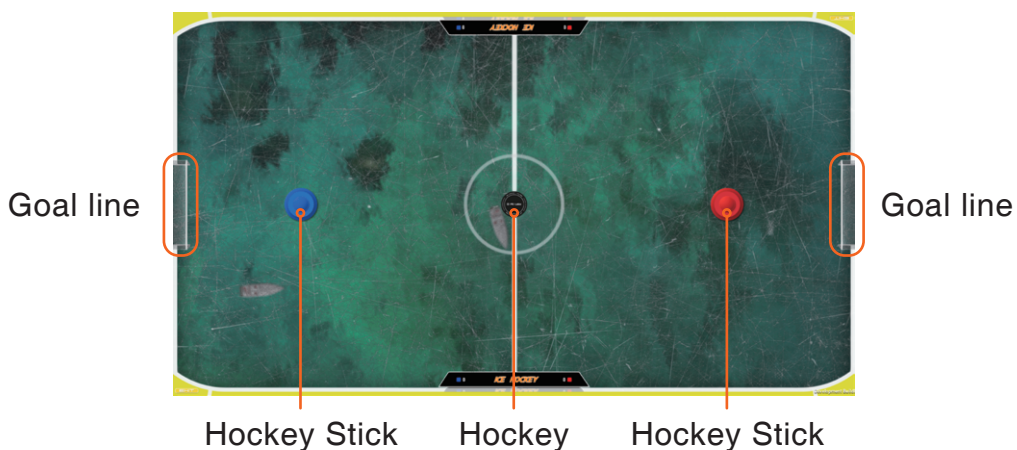

Click the pictures to view more

Swipe left/right to scroll

Hockey

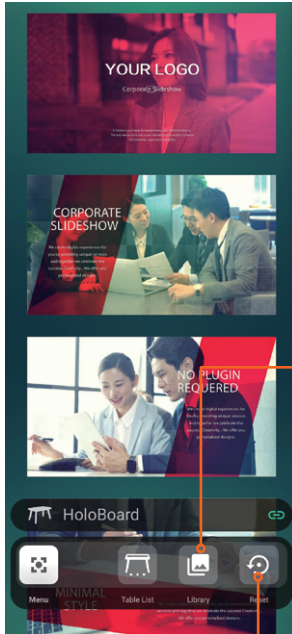

You can start the hockey application by click the application at the home menu.

The game support 2 players on the each side, player #1 will need to use the blue pad (hockey stick) to hit the black hockey while the other player will need to use the red pad (hockey stick) to block the black hockey, the first one reach the goal line wins.

Smartphone Content sharing

Manage the contents from the phone.

Open the application's library and choose to upload to the tabletop
